

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

2. In marking the equipment of battalions, the battalion number will be placed before the county name or regimental letters on the valise, and before the abbreviations on the rest of the equipment, thus:—1. **LOTHIAN**—1. Lo., for the 1st Battalion of The Royal Scots (Lothian Regiment). The arms, accoutrements, musical instruments, &c., of Regimental Depôts will be marked with the number of the Regimental District, followed by the letters R.D., but the Depôt clothing and necessities will be marked as in battalions, omitting only the battalion number. The Rifle Depôts having no numbers, the equipment remaining on charge at the depôts will receive the Territorial letters, with the letter D following.

3. The Militia Battalions will be distinguished from those of the Regular Army by the battalion number, and further, by the letter M., which (without the battalion number) will be placed upon the tunic or frock only; thus:—Lothian M., on the tunic and frock, will denote a *Militia* battalion of the Lothian Regiment; 3. Lothian on the valise, and 3. Lo. on the rest of the equipment will denote the 3rd Battalion, or the first *Militia* Battalion, of the same.

4. The undermentioned stamps, &c., will be used in marking the equipment, and Officers Commanding Battalions and Regimental Districts will, at once, put forward requisitions for such as they severally require. A portion of the stamps required being already in their possession, Commanding Officers will demand only those necessary to complete, and any stamps in possession, of descriptions not herein detailed, will be returned into store, as also

the leather shields and numerals hitherto employed for distinguishing the valises. The existing $\frac{1}{4}$ -inch copper inlaid, and the $\frac{1}{4}$ -inch gunmetal letters, being unsuited for use with the type-holder, should all be returned into store.

* The stamps marked with an asterisk, where already in possession, should be retained.

† The letters R.D. will be issued on demand for the use of Armourers employed in marking the arms of Regimental Districts.

‡ These stamps will be issued on loan, as required, under paragraph 426 of Equipment Regulations.

5. Commanding Officers in making requisitions will be careful to demand the proportions of large and small letters strictly in accordance with the regimental abbreviations detailed in § 1. All initial letters should be of the larger size; the terminal, or others, of the smaller. Thus, the "Highland Light Infantry" would require the initials, H.L.I., all of the larger size, while the "Lothian" Regiment would require the combination of large and small letters in the abbreviation L.O. Similarly, N^N (Northampton); LEIC. (Leicester). A set comprises one letter of each kind required.

6. When in use, the block figures and letters which mark with paint or ink will be set in the type-holder, which is supplied, in order to ensure uniformity and rapidity in marking.

7. As only one size of holder is issued, it is accompanied by three small wooden blocks to pack-in the smaller type. These blocks, if lost, must be regimentally replaced.

8. The paper stencil-plates will be cut with the required Territorial names or letters and battalion numerals by the Ordnance Store Department, Royal Arsenal, Woolwich, and will be issued thence to corps. The plates will be prepared for marking as described in paragraph 13.

9. The following allowances will be granted for re-marking the equipment of the Infantry of the Line.

- a. The sum of 9d. for every 300 water bottles, or straps for the same; or every 300 ammunition bags, waistbelts, braces, white haversacks, pouches, straps, and the insides of the flaps of valises, under paragraph 447, Equipment Regulations, 1881.
- b. The sum of 9d. for every 300 frogs and slings for rifles.
- c. The sum of 1d. per valise for marking the outside of the flap with white paint, using the stencil plate and brush.
- d. The sum of 4d. for re-marking each squad bag, under paragraphs 456 and 457, Equipment Regulations, 1881. This allowance will cover any expense attending the removal of old marks, which may readily be done with a little turpentine and a piece of rag.

10. The above allowances will cover both labour and the cost of paint or ink expended. (*Vide* paragraph 409, Equipment Regulations, 1881.)

11. The equipment of Regimental Depôts will be re-marked, generally, in accordance with paragraph 458, Equipment Regulations, 1881. The arms will be dealt with specially as directed in paragraph 472 of the same, and musical instruments under paragraph 449, consistently with paragraph 2 of these Instructions.

12. Militia Battalions will have their equipment re-marked under the following instructions:—

- a. Accoutrements will be re-marked under paragraph 1261, Militia Regulations, 1880. Stamps will be provided on repayment, and the actual cost of marking, not exceeding one half-penny an article, which must include the provision of stamps and ink, will be allowed.
- b. Musical instruments will be re-marked under paragraph 1263, Militia Regulations, 1880, and the allowances therein sanctioned will be granted for the amount of engraving actually performed.
- c. Pending further instructions the marking of arms now in possession will remain unchanged for the present.

13. Marking the outer flap of the valise by means of stencilling has been *provisionally* approved. In marking the flap, the battalion number and county name or letters will be placed as nearly as possible across the centre of the valise, thus:—

1. LOTHIAN. 2. E. KENT. 3. WARWICK.

But where initial letters only are used, care will be taken to place the battalion number on the left of the central strap which passes over the flap, and the regimental letters on the right, leaving a space between for the strap, thus:—

8 1. | R.F. 2. | R.I. 3. | S.W.B.

The grenade and bugle used respectively with Fusilier and Light Infantry regiments will be placed to the left of the numeral.

The initial letters and numerals are $\frac{1}{4}$ inch high; the terminal and other letters $\frac{1}{2}$ inch high.

14. In marking the valise the brush should be used almost dry with the paint thick. The flap should be laid flat upon a hard smooth surface, and the paint *dabbed in*, the brush being held vertically, and on no account worked across the stencil-plate. The back of the plate should be kept clear of paint with a turpentine rag, and the face also occasionally wiped with the rag to prevent an accumulation of paint.

15. The valises of Regimental Depôts will not be marked on the outer flap. They will be marked on the inside only with marking ink.

16. White paint, of the following composition, should be used in stencilling:—

Lead, white, ground in oil	..	lbs.	4
Gold-size	gill	$\frac{1}{2}$
Turpentine	„	$\frac{1}{4}$

The marking with this mixture will dry, in an ordinary store, in about eight hours.

17. It will not be necessary to re-mark articles of clothing and necessities now in possession, but the new territorial system of marking will be observed with all new issues.

18. The amendments rendered necessary, in consequence of these instructions, in the Equipment Regulations, 1881; the Regulations for the Supply of Clothing and Necessaries to the Regular Forces, 1881; and the Regulations for the Militia, 1880, will be notified hereafter.

their charge, as well as for the requisite observations being made, either by the Registrar in a General Hospital (*see* Part 2, Sec. II., para. 117), or by some competent person who may be selected for that purpose, and in accordance with the following instructions:—

- (1.) As it is of great importance to preserve unimpaired the continuity of Meteorological observations, all changes in the adjustment of instruments, in their position, mode of reading, or registering, will, as far as possible, be carefully avoided.
- (2.) The observations will, as far as possible, be made by one person; where this is not practicable, the deputy to whom they are confided will previously assure himself that his method of reading is identical with that of the principal observer, and both should satisfy themselves by mutually testing the accuracy of their reading.
- (3.) Registers (Army Form K 1292) should be as perfect as possible, but if, from any cause, observations be lost, no attempt should be made to fill the blanks so caused.
- (4.) The observations will be made at stated and regular times.
- (5.) Before taking the means of the numbers in each month, the observer will look down each column in the Register to see that no evident error of entry has been made (an inch, for instance, in the reading of the barometer is a common error). He will examine the thermometric readings to see that the maximum and minimum readings have not been interchanged; and, before dividing the sums of the numbers, he will count, in each column, the days on which observations have been entered, so as to exclude error in the division. Decimal arithmetic will be used throughout.
- (6.) With the exception of the "attached thermometer," all thermometers must be read to the tenths of a degree.
- (7.) The readings of the self-registering maximum thermometers at 9 a.m. must be entered in the Register (columns 35 and 37), as the temperature of the preceding day; for instance, the readings of the self-registering maximum thermometers at 9 a.m. on the 1st of the month must be registered as the temperature of the last day of the previous month; the

his discharge. They will not be included in any Ledger or return after issue.

65. The kits of deserters will be sold and the amount realized credited in the man's non-effective account. **Deserters.**

66. A man transferred from one Militia Regiment to another will take his kit with him, and will be furnished at the public expense with any articles which may be used in the Regiment to which he is transferred, but not in the Regiment from which he is transferred. **Transfers between Regiments to take kits with them.**

SECTION VIII.—MARKING.

67. Clothing, great-coats, capes, leggings, mess-tins and mess-tin covers, as well as all Necessaries issued to the Permanent Staff, or to Militiamen, will be marked. **Articles to be marked.**

68. The Clothing and Necessaries issued to the Permanent Staff will be marked with the Regimental number of the man to whom issued, and the title of the Regiment. The great-coats, capes, and leggings will be marked with the initials of the Regiment, the date of issue, and a consecutive number from 1 upwards. An allowance will be made for marking all the articles. See paragraph 160. **Permanent Staff.**

69. All articles issued to Militiamen, will, when appropriated for use, be marked with the initials of the Regiment, the first year of training for which they are to be used, and a consecutive number from 1 upwards. **Militiamen.**

70. If a Militiaman shall lose or require to renew any article, the article issued to complete will be marked, at the man's expense, with the actual date of issue and with the same number as had been originally borne by the article replaced, so that the numbering may remain uniform throughout.

71. The number given to an article on its first issue will be retained by it until the article is worn out. **Number not to be changed.**

72. At the expiration of each Training, the articles used will be stamped with the last two figures of the year of such Training. **Stamping after each Training.**

73. As no marked articles can be received back from a Regiment into the public stores, the marking of boots will be deferred until they have been fitted to the men, and of other articles until appropriated for men of suitable dimensions actually enrolled. **Articles not to be marked until fitted.**

74. The rates allowed for marking are given in paragraph 160. **Rates for marking.**

75. The boots issued to the Militiamen, will be marked at the expense of the men to whom they are supplied.

Section IX.**Accounts.**

Adjutant responsible.

76. The Adjutant will be held responsible that this marking is properly effected.

77. Stamps for marking condemned Clothing prior to delivery to the Contractor, will be demanded from the Ordnance Store Department. Paint will be provided by the marker, and the marks will be placed on such parts of the article as will not prevent its sale by the Contractor or Purchaser. For marking allowance see paragraph 160.

SECTION IX.—ACCOUNTS.

Ledger.

78. All articles, the property of the public, received from the public Stores or from any other source, will be brought on charge on the debit side of the Ledger (Army, late W.O. Book 261), and the final disposal of such articles will be recorded on the credit side of the Ledger.

Articles with companies are on "inventory."

79. Articles in possession of companies for Training purposes will remain on charge in the Ledger, as the Adjutant will hold vouchers for them, and such articles will therefore be regarded as "held on inventory" instead of being struck off charge.

Clothing Register.

80. A Clothing Register (Army, late W.O. Book 260) will be kept, with pages set apart for each article of Clothing used in the Regiment, except the boots which are taken away by the men after each Training.

Arrangement of the Clothing Register.

81. The Clothing Register will contain blank columns—

- (a.) For the consecutive number.
- (b.) For the number of Trainings' wear, if any, brought forward from the preceding record of the same article.
- (c.) For the years (the dates of which will be entered in the headings in manuscript) during which each article may be worn or used.

Entries in the Clothing Register.

82. The Clothing of the Permanent Staff will be kept separately in the Register.

83. In the columns of the Clothing Register, under the year of Training, and after the Training has expired, the regimental number and name of the man who has used, or worn, each garment or article, will be entered; a line being drawn across the space if the articles shall not have been used at all during the period.

Entries of new garments in the middle of a page.

84. When a new garment or article shall be appropriated to fill up a blank number, before all the columns in a page of the Clothing Register shall have been filled up, the letter N in red ink will be plainly marked against the entry of the man's name in the column for the year, and the register number will be repeated in red ink, so that the proper number of Trainings'

wear may be readily seen and carried forward when it shall become necessary to open a new page.

85. The annual Accounts rendered on Army Forms H 1102, and H 1136 (late W.O. Forms 595 and 865) will be compiled from the Ledger and Clothing Register, and will be accompanied by the receipts of Ordnance Store, or other Officers for articles given into Ordnance Store, or transferred to other Corps.

of annual
Accounts.

86. The annual Accounts will be furnished separately as follows:—

Annual

(b.) The Account of Clothing for Militiamen on one copy of Army Form H 1136 (late W.O. Form 865) within two months after the completion of the Training.

87. All the Clothing on charge of the Regiment at the date of the previous annual Accounts, as well as all articles subsequently received from Public Store, or authorized to be purchased, except articles supplied on repayment, will be fully and carefully entered in the annual Accounts, which will also contain an exact account of the Clothing, and other articles brought into use, worn out, lost, destroyed, or made away with.

All articles to
be accounted
for.

SECTION X.—GENERAL REGULATIONS.

88. The annual requisition for Clothing for the Permanent Staff will be forwarded to the Director of Clothing not later than the 31st August in each year, in duplicate, on Army Form H 11 40 (late W.O. Form 885), and will be accompanied by a size-roll in duplicate on Army Form H 11 38 (late W.O. Form 863). Care will be taken that the demand includes the whole of the Clothing required for each man at any period during the subsequent military year.

Annual
requisitions
for Permanent
Staff.

89. Free Kits for members of the Permanent Staff will be demanded as required on Army Form H 1144 (late W.O. Form 866), on which will be given the names and dates of completion of 21 years' Army service of the men for whom required.

Kits for the
Permanent
Staff.

90. The annual requisitions for Clothing for the Militiamen will be forwarded to the Director of Clothing within two months after the completion of the Training. Care will be taken that a store sufficient for the total enrolled strength of the Corps is maintained, but no article beyond such strength will be demanded, except such a margin not exceeding 5 per cent. of articles supplied in sizes as is actually necessary to fit the Regiment readily on its assembly for Training.

Annual
requisitions
for Militia-
men.

91. Demands for Clothing for the Militiamen will be submitted in duplicate on Army Form H 1140 (late W.O. Form

- Requisitions for great-coats and leggings.** **92.** Demands for great-coats and leggings will be made upon Army Form H 1101 (late W.O. Form 130), on which also the proceedings of the Board of Survey on the great-coats and leggings considered unserviceable will be shown.
- Board of Survey.** **93.** Supplementary demands will, when necessary, be made on the Army Forms mentioned in paragraphs 88, 89, 91 and 92.
- Disposal of unserviceable Clothing, great-coats, and leggings.** **94.** Boards of Survey, during the Non-training period, will in all cases be composed of two Adjutants.
- 95.** Instructions as to the disposal of unserviceable Clothing, great-coats and leggings, will be obtained from the Director of Clothing.
- 96.** An Adjutant directed to hand over unserviceable articles to an Ordnance Store Officer, or to a Contractor, will not cause them to be despatched until instructions in regard to them have been received from the Ordnance Store Officer.
- Nominal roll of Companies.** **97.** Before the commencement of the Training, the Adjutant will call upon the Serjeant-Instructor of each Company, as representing the Captain, to furnish him with a list, Army Form H 1142 (late W.O. Form 864) showing the regimental numbers, ranks, and names of all men of the Company who may be expected to attend at the Training.
- Cards showing articles for use of each man.** **98.** From the lists on Army Form H 1142 (late W.O. Form 864), and from the Clothing Register, the Adjutant will prepare cards, Army Form H 1141 (late W.O. Form 859), giving the title of the Regiment, the man's regimental number, and the year of Training on one side, and on the other a complete list of the articles required, with the register number of each article that has been appropriated for the man's use.
- Cards to be distributed by Serjeant-Instructor.** **99.** These cards will be distributed by the Serjeant Instructor of the Battery or Company to the men (two to each man, one marked original, the other duplicate), as they come up for Training, and each man on producing his card (marked original) to the Adjutant, will receive in exchange a complete outfit.
- Card to be given by man in exchange for his Clothing.** **100.** The cards being retained by the Adjutant will constitute vouchers for the articles in wear, and will afford a complete inventory of the same. One card will be retained by the man, and will show him the articles for which he is responsible.
- Clothing lists to be completed from cards.** **101.** From the cards, the Adjutant will complete the Clothing lists, Army Form H 1142 (late W.O. Form 864) with the register numbers of the articles served out to each man, and will then compare the lists with the muster rolls to see that the men are really effective.

General Regulations.

Section X.

102. The Adjutant, in the presence of the Captain or his representative, will, during the Training, see each Company, in turn, paraded, and will compare the articles in possession of each man, and the register numbers which the articles bear, with the cards and the lists, and will correct any discrepancies that may be discovered. The Clothing list will then be signed by the Captain.

Articles of Clothing in possession of men to be checked.

103. After the Clothing lists shall have been signed by the Officers Commanding Companies, the cards received by the Adjutant will be given to the Serjeant-Instructors, but, at the expiration of the Training they will be returned, together with those not used in consequence of the absence of the men for whom they were made out, to the Adjutant, and will be destroyed by him.

Cards to be destroyed at end of Training.

104. The Clothing will be given into Store at the expiration of the Training, and will be checked by the Clothing lists, and all articles not forthcoming will be accounted for to the Adjutant.

Clothing given into store. Completion of.

105. The Clothing Register (Army, late W.O. Book 260) will then be completed, and the annual demands and Accounts be made out.

Clothing Register.

106. Before the annual Accounts are forwarded to the Director of Clothing, stock will be taken by the Adjutant, in order to ascertain that the aggregate quantities and classification of wear agree with the statements in the Accounts.

Stock-taking.

107. Records will be kept of the measurements of all Militiamen; recruits, when found fit for the active lists of their Regiments, will be carefully measured, and will be fitted with Clothing, due allowance being made for the growth or development of the body in consequence of drill.

Measurements of men to be recorded.

108. All the articles of Clothing appropriated for the use of each man will be kept together, and be always ready for issue to him.

Clothing for each man to be kept separately. Opening of packages.

109. Immediately after the receipt of articles from the Royal Army Clothing Depôt or other Public Store, the packages will be opened in the presence of, and the contents be examined by, two Adjutants, and if any deficiency or damage be found to exist, a report will be immediately forwarded to the Director of Clothing. Should this instruction be neglected, no complaint made subsequently will be entertained.

110. The pairs of boots received from Royal Army Clothing Depôt or other Public Store will not be untied or separated until they shall have been fitted and appropriated to the men, and they will invariably be issued in pairs as received.

Pairs of boots not to be untied until appropriated.

111. Should any complaint be made by a member of the Permanent Staff, or by a Militiaman, of the quality of an article issued to him from the Regimental Store, the case, if it occurs during Training, will be investigated by a Board of Officers, and, if during the Non-training period, by two Adjutants, and

Complaints to be investigated.

the report will be forwarded by the Adjutant, with his observations, to the Director of Clothing for instructions.

112. No article of Clothing will be returned to the Royal Army Clothing Depôt or other Public Store without the sanction of the Director of Clothing being first obtained. In applying for authority, the Commanding Officer will state on what date the articles were received by him; his reasons for wishing to return them; their condition; and whether they are or are not regimentally marked. On the receipt of the authority for their return, care will be taken, before their transmission, that the number and description of the articles forwarded exactly correspond with the particulars specified therein, and that no article is included which was not originally received from the Royal Army Clothing Depôt or other Public Store, as such article, if sent, will be returned to the Regiment, and the carriage both ways charged against it. The Regiment from which the articles are sent will be shown on the labels of the packages.

Disposal of
empty
packages.

113. Militia Regiments will return all casks and cases received with Clothing, Necessaries, or War Office Forms to the nearest Ordnance Store Officer, at the same time forwarding to such Officer the usual vouchers.

Packages to
be accounted
for.

114. Packages issued to Regiments of Militia with Clothing, Necessaries, or War Office Forms, and those issued with Clothing or Necessaries specially demanded on repayment, will be brought on charge in the Clothing Ledger and in Army Form H 1136 (late W.O. Form 865).

Rates for
specialities.

115. When permission is given to Regiments of Militia to provide regimentally any articles of Clothing, the rate to be charged for each article so provided will be notified by the Director of Clothing, or be promulgated in the Army Circulars. When there is no rate fixed and instructions are given to provide the articles locally, the rates at which several Firms would undertake to supply them will be obtained and submitted to the Director of Clothing for his approval, before any of them are accepted. In such cases the letters forwarding the tenders will be marked "Pressing."

Clothing to
be searched.

116. On the receipt of the Clothing into store, at the termination of each Training, it will be carefully searched, and the pockets emptied of any articles that may be left in them.

Articles
requiring
repairs.

117. A return of the Clothing of the Militiamen, exclusive of the Permanent Staff, which absolutely requires repairs, together with an estimate of the cost of effecting the same, will be transmitted not later than one month after the termination of the Training, to the Director of Clothing, on Army Form H 1137 (late W.O. Form 868), for authority to incur the expense. The application will be supported by a statement showing in detail the nature of the repairs required, and if no part of the estimate is chargeable to the men under paragraph 119, by a Certificate to that effect.

General Regulations.

Section X.

118. Arrangements for the repair and cleansing of Clothing at the termination of the annual Training, will be carefully considered by Officers Commanding Regiments, before any decision is arrived at as to the amount of expenditure to be proposed in the estimate; and as the repairs to the Clothing are usually of a simple character, they will, if possible, be executed by men of the Permanent Staff, whether tailors or not.

Arrangements for repairs or cleansing to be carefully considered.

119. The cost of replacing buttons or other parts of articles which have been lost will not be allowed against the public. The repairs chargeable to the public will be limited to those for damages caused by necessary wear and tear, and will not include damages which arise from carelessness or mischief. The cost of such repairs, cleansing, or fumigation, as are attributable to the negligence or want of personal cleanliness of Militiamen will be charged to the men concerned, but will be included in the return referred to in paragraph 117.

What repairs are chargeable to the men.

120. The following solutions will be found effectual in removing the stains from scarlet frocks, viz.:—

One ounce of salts of sorrel dissolved in one and a-half pints of boiling water, and one ounce of cream of tartar dissolved in one and a-half pints of cold water; each solution being kept in a separate vessel. This quantity will be sufficient for eight garments.

Solutions for cleaning scarlet frocks.

121. Frocks which require cleaning will first be well beaten and brushed. A perfectly clean hard brush will then be used in applying the solutions alternately to the garments, commencing with the salts of sorrel, until all the stains have been completely removed. If the weather will permit of it, the garments will then be hung up in the sun to dry, but if not, they will be hung up in a dry place, but not near fires or stoves.

Mode of applying the solutions.

122. The ingredients will be obtained on the spot, and application to incur the necessary expenditure will be made to the Director of Clothing. Each application will be accompanied by a statement of the quantities required, the cost at which they can be procured, and the number of garments to be cleaned, and when authority has been received the work will be performed by the Permanent Staff as a duty.

Provision of ingredients for cleaning.

123. Should the articles be found in such a state as to render fumigation or any special mode of cleansing necessary, a separate estimate of the expense at which the materials for the purpose can be bought will be forwarded with the estimate for repairs, and a separate explanation of the causes which have led to such an exceptional state of the articles will be furnished. When the cost of the materials shall have been authorised, the Permanent Staff will carry out the work.

Fumigation.

124. Each application by a Commanding Officer to incur expenditure for the repair, cleansing, or fumigation of Clothing, will be accompanied by a statement showing the names of the

General Regulations.

men chargeable for any proportion of the estimated cost of these services, and the amount assessed against each man.

Worn-out
garments
retained for
cutting up.

125. A few suits of worn-out garments will, upon application to the Director of Clothing, be allowed to be retained for the repair of others, but the collars of the frocks and the waistbands of the trousers will be required to be given up to the Ordnance Store Officer.

Repairs of
boots.

126. No Allowance will be granted for the repair of boots.

Cleaning
Clothing at
termination of
Training.

127. As the Clothing will be kept clean by the men during the Training, the only cleansing which should be necessary when it is taken into store at the termination of the Training will be to brush it, which will be done by the Permanent Staff, but no charge for the performance of this duty will be admitted against the public.

128. Articles of Clothing issued to replace losses, articles destroyed by wilfulness or neglect, or articles worn out, will not be charged for, but they will be required to wear for the full periods laid down in these Regulations; and the value of the article lost, destroyed, or prematurely worn out, calculated according to the number of unexpired Trainings or months during which the article should have been used but was not, will be charged against the man, together with the worn-out value, in the same manner as laid down in paragraph 130, except in cases in which the articles are forthcoming, when the worn-out value will not be charged. See paragraph 131.

129. The full value will be charged for new great-coats and capes; for worn-out coats and capes, the worn-out value will be charged; but for part-worn coats and capes, the proportionate value for each year which the lost article had to be worn, when lost, will be charged in addition to the worn-out value. The annual Clothing Accounts will show the articles lost, the amounts recovered, and the Pay Lists in which the credits will be found.

Mode of
computing the
value of lost
articles.

130. The following is the method of computing the value of a lost article:—

- (a.) Deduct the worn-out value of the lost garment from its value when new.
- (b.) Divide the remainder by the number of months or trainings the garment should wear.
- (c.) Multiply the quotient by the number of months or trainings the lost garment has actually been worn.
- (d.) Subtract the result from the total value of the garment when new.
- (e.) The remainder will be the sum to be charged to the soldier.
- (f.) Any part of a month will be taken as a whole.

Worn-out

be charged for articles forthcoming.

132. Where the worn-out value of an article is less than one shilling, it will not be taken into account in the calculations required to find the amount representing the value of the unexpired period of wear, but not less than the worn-out value will be charged in any case.

Worn-out value less than one shilling.

133. A list of such articles as are to be charged for, whether as lost or issued on payment, will be made out by the Adjutant against each Company, and handed to the Accountant who renders the Pay Lists for the Permanent Staff. The latter Officer will then complete the cash portion of the document, and include the total amount as a charge against the Officer Commanding, at the same time crediting the public with the amount.

Accountant to complete cash portion of vouchers.

134. The articles required to replace losses by desertion will be supplied free of charge; but the deserter on rejoining will be required to pay the value, as detailed in paragraph 130, of such articles as he may have made away with.

Losses by desertion.

135. Charges on account of Clothing will not be included in any Pay List rendered to the War Office unless they have been authorized by the Director of Clothing.

Clothing charges in Pay Lists.

136. The Abstract of Charges will show the whole expenditure, whether a portion is to be recovered from the men or not, and the amount recovered from the men who, under paragraph 119, have to pay for wilful damage, carelessness, or want of personal cleanliness, will appear as a credit to the public in the Abstract of Receipts.

To show whole expenditure.

137. The charges and credits on account of Clothing will appear in the Pay List of the period during which the charges have been authorised or the credits have been received. The charges will be submitted for the approval of the Director of Clothing as they are incurred.

Charges and Credits.

138. In the case of charges for making-up or fitting Clothing and for marking Clothing, great-coats, head-dresses and leggings, the number of the order (which will be found quoted on the Delivery Voucher) on which the articles were issued from the Royal Army Clothing Depot will be quoted on each claim, and, where more than one order is quoted, the number of articles charged for on each will be distinctly shown.

Charges for making up, fitting, and marking Clothing.

139. Abstracts of Charges will be accompanied by any provisional authorities which may have been previously given by the Director of Clothing for incurring expenditure for services not fully provided for in these Regulations. The provisional authority will empower the Accountant to disburse the money necessary, and will be a voucher to that effect, but no charge on account thereof will appear in the Pay-List without the authority referred to in paragraph 140.

141. Charges for re-altering Clothing will be accompanied by an explanation of the causes for the necessity for the charges.

142. When a garment has been fitted to a man it will be retained as far as practicable for his exclusive use so long as he remains in the Regiment, or until the garment is worn out.

143. If sufficient care be taken, the necessity for altering Clothing ought not frequently to occur, and, as the frock issued under present regulations is intended to be a loose-fitting garment, it should very seldom require alteration.

144. The alteration of Clothing will only be carried out on the written order of the Commanding Officer, specifying the articles to be altered, and the names of the men for whom they are required; and such order will not be given until it has been ascertained that the garment which it is proposed to alter will not, without alteration, fit any Militiaman in the Regiment, of dimensions corresponding to the size marked on the garment, and who has not already been fitted.

145. In making arrangements for the alteration or repair of Clothing, the person who is to perform the work will sign an agreement to do the same at specified rates. This agreement, together with the tradesman's original receipted bill, and the written orders under which the work was executed, will accompany the voucher forwarded to the Director of Clothing for pre-audit.

146. One abstract to be furnished with each Pay List will include all sums on account of Clothing and Necessaries credited to the public, and care will be taken that credits for separate years are not mixed up, and also that the credits correctly represent the value of the items struck off in the Accounts concerned.

147. Whenever a statement is made in the Clothing Account, that credit for a certain sum will be given, the date of the Pay List rendered to the War Office, and, if possible, the number of the voucher, in which such credit will appear, will be distinctly quoted.

148. Before articles are destroyed or struck off charge on account of the wearer having suffered from infectious or contagious disease, special authority will be obtained from the Director of Clothing, unless the Medical Officer shall certify that cleansing and fumigation will not be sufficient to prevent the spread of infection or contagion, and that the immediate destruction of the articles is absolutely necessary, in which case the articles will be at once destroyed, and application will be made to the Director of Clothing for covering authority to strike them off charge. When the Clothing can be disinfected, such steps as the Medical Officer may consider practicable and

In all cases the report made to the Director of Clothing will be accompanied by the certificate of the Medical Officer, showing the nature of the complaint, and the steps recommended by him, as well as by a statement of the names of the diseased men, of the articles infected, and the time they have been in use.

149. It should be clearly understood that articles will not be considered to have been worn the full periods, unless they have been actually in use. The years or trainings during which articles remain unused in the Regimental Store will not count in reckoning the time articles have been worn.

When an article is to be considered worn out.

150. The Adjutant of the Militia Regiment will be at all times responsible for the efficiency, and will be held accountable for the quantity and condition of the Clothing of his Regiment; and all requisitions and receipts for the same will, on all occasions, be signed by him. No Non-Commissioned Officer or private will be recognised in any way as a sub-accountant or store holder of regimental Clothing or Necessaries.

Responsibility of the Adjutant.

151. Compensation in lieu of Clothing or Necessaries will not be allowed under any circumstances either to members of the Permanent Staff who are not serving on their Army engagements or to Militiamen. Members of the Permanent Staff who are serving on their Army engagements will be paid compensation, as laid down in paragraph 17.

152. Adjutants of Regiments from which men are transferred will furnish Adjutants of Regiments to which they are transferred with full written particulars respecting the Clothing and Necessaries of every man transferred.

353*a*. Such cost will not exceed the amount of the forage allowance to which the Officer would have been entitled if a horse had been kept, during the period of the monthly or quarterly account (as the case may be) in which the claim is preferred.

Bounties—Regiments of Irish Militia.

(ISSUED AS A SPECIAL ARMY CIRCULAR ON THE 3RD MAY 1882.)

The training of the Irish Militia during the year 1882 having **Clause 120** been dispensed with by order of Her Majesty in Council, dated 6th February 1882, the following instructions, in regard to the payment of bounty to the non-commissioned officers and men of that Force, have been approved by the Secretary of State for War, and are issued for the information of those concerned.

1. The non-commissioned officers and men effective on the 1st April 1882, may be paid their Annual Bounty and Reserve Bounty, if entitled thereto, in the same manner as if their regiments had been assembled for training.

2. The Adjutant of the several regiments will make this generally known throughout the counties to which their regiments belong, and will arrange, with as little delay as possible, for the

Finance (Auxiliary Forces)—continued.

Clause 120 payment of the bounty, during the months of May and June, at the head-quarters of their respective regiments, as well as at those places, within the county, where the men are most likely to be met with.

3. Men who may be in prison awaiting trial at the time of the general payments may, if acquitted, be at once paid the bounty to which they may be entitled; but if they are found guilty of an offence not amounting to felony, the bounty will be withheld, and instructions asked for. If the offence is one which amounts to felony, the bounty will be forfeited, and the man should be at once discharged from the Militia, under the provisions of paragraphs 193 and 194 of the Regulations for the Militia, 1880 (Army Regulations, Vol. VIII.), as amended by Clause 125, Army Circulars, 1881.

4. Men who, for other reasons, may not be forthcoming when the general payments take place, and who afterwards make application for their bounty, may be paid the same, unless there are any special circumstances which render it desirable that the payment should be withheld, pending reference to the War Office.

5. The bounty may be paid to men who were effective on the 1st April 1882, but have since become non-effective; to men who have volunteered for the Regular Army since that date; and also to men who may be absent from the county, and who apply for the same by letter; but in the latter case due care will be taken to obtain satisfactory evidence of their identity by descriptive returns, and communications with their employers, or the local magistrates; and the genuineness of receipts should, in all cases, be established to the Accountant's satisfaction.

6. Men may be re-engaged for the Militia, and re-enlisted for the Militia Reserve, under the conditions prescribed by the Regulations, at the time that their ordinary Militia bounty for the year is paid to them, and may be granted re-enlistment bounty and Reserve bounty in the same manner as if they had re-engaged at the termination of the training, under the provisions of paragraphs 579 and 585 of the Regulations for the Militia (Army Regulations, Vol. VIII.), and of paragraph 596 of the same Regulations as amended by Clause 221, Army Circulars, 1880.

7. A statement of the bounty paid will be prepared on Army Form N 1496, which will be forwarded to the War Office as soon after the 30th June as possible. The total of the bounty paid, as shown on this form, will be carried to the General State of the Regimental District Pay List.

8. The names of all the non-commissioned officers and men belonging to the several regiments will be entered in alphabetical order of companies in the Statement (Army Form N 1496), and

Finance (Auxiliary Forces)—continued.

the dates on which the engagements of any of the men shall have terminated since bounty was paid to them for last year, will be shown against their names in the column of remarks. **Clause 120**
continued.

9. The War Office, or other authority for striking off the names of any of the men, whether on account of sickness, desertion, enlistment into the Regular Forces, or purchase of discharge, or for any other cause, will be forwarded as vouchers to the Statement, and the date of death of any men will be noted in the column for remarks.

10. The signatures of the men will be placed against the amounts charged for them in the Statement, and the column under the heading "Travelling and Conveyance" may be used for this purpose.

11. The travelling expenses of the Adjutants, while employed away from the Head-Quarters of their regiments in paying bounty, will be claimed in the same manner as their ordinary travelling expenses. Those of the Staff-Serjeants will be charged in the accounts of the Regimental District. No charges will be admissible for travelling expenses or allowances to men coming to receive the bounty due to them.

12. The bounty paid after the despatch of the Statement on Army Form N 1496 will be charged in the Regimental District Accounts, vouched by a Statement of Details, made out on spare sheets of Army Form N 1496.

13. The year 1882 may be reckoned as a year of training for men who are released on and after the 1st April 1882, to join the Regular Army under the Regulations on the subject, provided they were on the strength of their Militia regiments on that date.

Pay and Allowances of Men—Levy Money.

1. The following, which will take effect from the 1st July 1882, will be substituted for paragraph 615 of the Regulations for the Militia, 1880 (Army Regulations, Vol. VIII.), as amended by Clause 247, Army Circulars, 1881, and Clause 24, Army Circulars, 1882 :— **Clause 121**

but no refund of the reward and bringing-money will be required unless the inadmissibility is discovered and notified to the recruiter within three months from the date of attestation.

II.—AUXILIARY AND RESERVE FORCES.

MILITIA.

Musketry Instruction.

Clause 129 1. With a view still further to increase the efficiency in musketry of Militia Battalions, it has been decided to authorise the issue of 40 rounds of ball ammunition to each recruit and 40 rounds to each trained Militiaman.

The following will accordingly be substituted for paragraph 296 of the Militia Regulations, 1880 (Army Regulations, Vol. VIII.), as amended by Clause 176, Army Circulars, 1881, and for paragraph 298 of the above-mentioned Regulations:—

296. The annual course of target practice of the companies will occupy three days, unless the Commanding Officer may wish to fire only 10 rounds a day, when it will occupy four days.

298. The "figure of merit" will be determined by the average points in individual and volley firing. The figure of merit, the best shooting company, and the best shot of the Militia, are published annually, except in the case of battalions in which less than 70 per cent. of the men effective (excluding recruits) in the battalion or half-battalion, as the case may be, have been exercised through the course of target practice.

2. The annexed Tables A and B (*see* Appendices, pages 29 and 30), will be substituted for Appendices I. and II. of the above-mentioned Regulations, as amended by the tables promulgated by Clause 64, Army Circulars, 1881, and the Form A annexed (*see* Appendix, page 31), will be substituted for Appendix IV., as amended by the Form A promulgated by the same clause.

General Regulations (Auxiliary and Reserve Forces)—*continued.*

Prizes for Good Shooting.

3. The following will be substituted for paragraphs 651 and 652 of the above-mentioned Regulations, as amended by Clause 176, Army Circulars, 1881:— Clause 129 continued.

651. The prizes referred to in paragraph 299 will be of the value of 25s. each, and will be distributed to the best shots at the rate of one for every 10, or fraction of 10 men, who obtained 70 points and upwards, when exercised according to the course laid down in Table B (Appendix II., page 219), provided the men are not in a state of desertion or absence, except on account of sickness duly certified, at the date fixed for the award of such prizes.

652. When 10 per cent. at least of the men in any battalion exercised through the course laid down in Table B have obtained 70 points and upwards, a further sum of 1*l.* will be allowed for the best shot. This sum will be competed for as follows:—

The men eligible for the money prize of 25s. will fire 10 rounds each at a 2nd Class target at 600 yards, and the man who obtains the greatest number of points in this and the former practice (i.e., in the 50 rounds), will be considered the best shot of the battalion. Ties will be decided as follows:—

1st. By the results at each distance taken in inverse order.

2nd. By each shot taken in inverse order.

The additional reward will not be issued unless all the companies of the battalion shall have executed the course of Drill and Target Practice in accordance with Table B.

Small-Arm Ammunition.

4. The following will be substituted for paragraph 1184 of the above-mentioned Regulations as amended by Clause 87, Army Circulars, 1881, and for paragraphs 1186 and 1187 as amended by Clause 176, Army Circulars, 1881:—

1184. The following are the annual proportions of small-arm ammunition allowed:—

	Ball.	Blank.
For each Officer on first joining, and subsequently for each Infantry Officer who wishes to go through the annual course of individual firing	60	..
For each sergeant of the Permanent Staff { Infantry	90	..
Artillery and Engineers	40	..
For each non-commissioned officer and private present at training who has been previously instructed	40	10
For each non-commissioned officer and private present at training not previously instructed	40	20

General Regulations (Auxiliary and Reserve Forces)—*continued.*

Clause 129
continued.

1186. When 10 per cent. of the men exercised in any battalion of Infantry Militia obtain 70 points and upwards in firing their 40 rounds, a further allowance of 10 rounds of ball cartridge will be issued to each man who has qualified to compete for the further prize of 1*l.* under the conditions laid down in paragraph 652.

1187. In making out his annual requisition for small-arm ammunition, the Commanding Officer will demand for the numbers expected to be present at training, adding a certain amount for the above extra allowance, calculated on the proportion of men who at the previous training made 70 points and upwards.

5. The allowance of blank ammunition to be drawn *this year* will be calculated at 20 rounds for each Militiaman, being the rate allowed by paragraph 1184 of the above-mentioned Regulations for men not previously instructed.

6. Every Militiaman will be considered this year as "not previously instructed."

APPENDIX VIIIa.

Gunpowder and Ammunition in Magazines and Stores in charge of Royal Artillery.

(Referred to in paragraph 150, Part I.)

1. The contents of every magazine or store containing ammunition in Royal Artillery charge will in future be arranged, for local convenience and record, under the authority of Officers Commanding Royal Artillery, as follows:—

(a.) Loose powder, where exceptionally on charge, in groups by history.

(b.) Made-up cartridges, tubes, and fuzes, in groups which will be, as far as possible, collections of articles identical in nature, age, and history.

2. Groups having been once formed, great care will be taken to preserve their continuity.

3. Existing books and accounts relating to the stores in question will be continued, and no alteration will be made in the mode of keeping them; but to every magazine or store where ammunition is kept in Royal Artillery charge, a "Magazine, or Cartridge Store Record," or a "Shell and Fuze Store Record," will be issued.

4. These books will contain a number of sheets for showing the contents of the magazine or store, and the results of the various inspections, and, in addition, a suitable proportion of plain ruled sheets to be used for a journal.

5. The journal will consist of consecutive minutes (dated and initialed) relating to all occurrences of interest in connection with the magazine or store, and especially to all receipts and deliveries, and all inspections.

6. The progress of each day's work will be invariably entered in the book at the time.

7. Specimen printed pages showing the mode in which the records are to be kept will be found at the beginning of each book, and will be carefully followed as far as possible.

8. All entries in the books in question will be made in an Officer's handwriting.

Appendix to Chapter 143—continued.

9. During the six months ending 1st March and 31st September in every year, the Officer in charge of each Sub-District, assisted, if necessary, by an Officer of equal or superior rank detailed by the Officer Commanding Royal Artillery, will specially inspect each magazine and store containing ammunition in his charge, and will see that the record book is duly posted up.

10. Loose sheets will be supplied for the purpose of keeping a duplicate record at the Head-Quarter Office in each District. These duplicate records will be sent to the Sub-District Offices half-yearly, in time for the inspection as above, and will there be compared to date, to correspond with the sheets in the record book kept in the Sub-District. On each occasion of this being carried out, the fact will be recorded in the journal, and the duplicate will then be returned to the Head-Quarter Office.

11. Inspections by the Royal Artillery will be by groups in each magazine. Cylinders, metal-lined cases, or barrels containing made-up cartridges, tubes, and fuses, will not be opened, but will be examined externally and their appearance noted.

12. Books and forms, as below enumerated, will be required for carrying out the above services:—

Magazine or Store Record, Army Book 132.

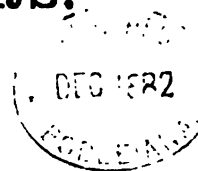

Shed and Fire Store Record, Army Book 133.

Loose sheets which are suitable for copying the records from either book, Army Form G 92A.

The Paymaster or agent through whom the Officer draws his pay will issue the above allowance upon the production of an order from the General Officer Commanding (or from the Adjutant-General of the Army, if the Officer be required to purchase a horse before embarkation for service), directing the Officer to provide himself with a horse. The Paymaster will report to the Officer in charge of the Remount Depôt that such issue has been made, and will charge the amount in his accounts to the head of Vote 10, Item D, Field Allowance Abroad. The charge will be vouched by the Officer's receipt, and by a certificate from the Officer under whose orders he is serving that a riding horse and equipment have been purchased by him.

241d. In the event of the Officer quitting the Force before the end of the campaign he will hand over his horse to the Remount Depôt, and at the same time report by letter to the Officer in charge that he has so done; or if the horse originally purchased has died or been killed, and has been replaced by him, he will forward a certificate, countersigned by the Officer under whose orders he is serving, showing the casualty and the date of replacement.

241e. This regulation is not applicable to any Officer who is entitled to be provided by his corps with a troop horse, nor to any Warrant Officer for whom public horses are authorised.

2. Paragraph 111 of the above-mentioned regulations is hereby cancelled.

Inst... 1979.

The Paymaster in charge of the District Office at a foreign station is responsible for the proper compilation and punctual transmission to the War Office of the Annual General Estimate for all Army services within the command. The estimate prepared on the printed forms transmitted from the War Office to each station, will be compiled in duplicate, with a due regard to the headings of the Parliamentary Votes, and the copies will be despatched by separate mails, so that one copy at least may reach the War Office not later than the 1st of December. Estimates from foreign stations.

Do.

54. To enable the Paymaster to compile this Estimate, every Regiment, Battalion, Corps and Department will furnish him by a given day with a detailed sub-estimate of its expenditure for the ensuing year. The details shown in the Sub-Estimates of the Royal Engineer Department, and of the Ordnance Store Department, may be limited to the proposed charges for Staff and subordinates, &c., the amounts therein estimated for works and stores as approved by the Officer commanding being shown only in gross. The sub-estimates will be forwarded to the War Office with the General Estimate. Detailed sub-estimates.

Do.

55. The General Estimate will be submitted to a Committee, composed of the Governor, the Officer Commanding, the Commanding Royal Engineer, the Senior Commissariat Officer, the Senior Ordnance Store Officer, and the Paymaster in charge of the District Office. The Committee will carefully consider each item in the estimate, and will suggest, for the Secretary of State's consideration, such reductions and alterations as they may deem expedient and practicable; and the report of their proceedings and recommendations will accompany the General Estimate, so that both may come under consideration at the same time. General estimate to be submitted to a committee.

Duties of Committee.

Army Expenditure Abroad.

56. As soon as possible after the necessary supplies have been voted by Parliament, a notification will be issued from the War Office to each District Paymaster abroad, informing him of the extent to which he is authorised to draw upon the Treasury Chest on account of Army services during the ensuing financial year, and stating the amounts appropriated under each vote and sub-head for the service of the command.

Expenditure in excess of the gross credit for any vote.

57. The District Paymaster will be responsible that these appropriations are not exceeded, except in cases of urgent necessity, and in such cases he will obtain a warrant from the General or other Officer Commanding for any expenditure in excess of the gross credit for any vote. The whole of the circumstances which have rendered the excess of expenditure necessary will be immediately reported in detail, for the information of the Secretary of State.

Alteration in the proportions assigned.

58. If it should be necessary to alter the proportions assigned to the sub-heads within the aggregate amount of a vote allotted to the command by the War Office, the District Paymaster will apply for the authority of the General or other Officer Commanding, and will immediately report the alteration to the Secretary of State, explaining at the same time the necessity for it.

Provisional Credit.

59. In the event of the notification referred to in paragraph 56 being delayed, the District Paymaster will apply to the General or other Officer Commanding for a provisional credit, which will be immediately reported to the Secretary of State.

Summary of estimates.

62. The District Paymaster will summarise these Estimates under the headings of the Parliamentary Votes, so as to enable him to take measures for procuring the necessary funds, and to keep himself informed of the progress of expenditure as compared with the sums voted by Parliament. He will thus be in a position to anticipate any possible excess on the votes, and to report it to the Officer Commanding.

Excessive estimates.

78. Should it be found, notwithstanding every precaution, that an over-estimate has occurred, a Report will at once be made, if at home to the War Office, and if abroad to the Officer in charge of the Treasury Chest, in order that the cash drafts may be reduced or withheld, or a repayment made, according to the circumstances of the case.

Unnecessary sums not to be retained.

79. A Paymaster will not on any plea whatever retain in his hands any larger sum of public money than may be absolutely necessary to meet his immediate requirements; and in the case of a Paymaster attached to a regiment, battalion, or corps, any unforeseen sum exceeding 50*l.* coming into his hands should be at once reported to the War Office, or, if abroad, to the District Paymaster, in order that a corresponding deduction may be made from the next issue of cash, or instructions given for the disposal of the amount.

The balance on the last Pay List rendered (and not the balance on an intervening Account Current), will be brought forward, the net amount outstanding in the hands of sub-accountants will be stated under the head "Advances," and the balance of general cash, due to or by the Paymaster, will agree with that shown by his books on the day on which the Estimate is signed.

84. When a Regiment, Battalion, or Corps, or a Battery of Royal Artillery proceeds to India from a home station, the Paymaster will transmit to the War Office an Estimate in duplicate of the amount required for the period of the passage only. This Estimate will be forwarded to the India Office, and the funds will be issued to the Paymaster by that Department. This regulation does not apply to a detachment or draft proceeding to India.

No Officer can claim to be exempted from a liability to receive an imprest of public money for the purpose of making any special or local payment which cannot conveniently be made through another channel; but the concurrence of the Commanding Officer or the Senior Officer of the Department concerned should in every case be obtained before such a duty is imposed on an Officer. Officers receiving imprests will be careful to furnish such an account, and they will be held responsible for all money advanced to them until it has been satisfactorily accounted for. An Officer, other than a Paymaster, who has received an imprest will not, except in the greatest emergency and under proper authority, pass on the imprest or any part of it to another Officer. Should it, however, be requisite to do so he will at once report the circumstance to the Paymaster from whom he received the advance, affording at the same time full information as to the name of the Officer to whom, and the purposes for which the payment was made. All such transactions should be immediately reported to the Chief Paymaster at the station, who will take special steps to secure an early settlement of such advances. 144. The Cash Issues will be vouched in every case by the signature of the Officer concerned on Army Form O 1681.

145. Receipts and payments, other than Imprests and Cash Issues, will be separately classified, according to the nature of the service, in the forms provided for that purpose in the Account Current.

146. The balance brought forward in the Account Current will be the cash balance as shown by the Balance Sheet forwarded with the Half-yearly Pay List for the preceding half year (*see* paragraph 110).

147. The balance on each Account Current will show the cash balance in the Paymaster's charge—*i.e.*, the amount of money which he may have in hand added to the amount, if any, lying to his credit at a bank after allowing for outstanding cheques, at the expiration of the quarter to which the Account Current refers.

148. In the event of such cash balance exceeding the sum of 50*l.*, the Paymaster will furnish an explanation of the circumstances under which the excess has arisen (*see* para. 119).

149. The balance on the Account Current will not be carried forward.

156. The Paymaster will thoroughly examine the Pay Lists rendered to him, and note therein any errors that are detected, in such a manner as not to obliterate the original entries. Examination of sub-accounts.

157. The Paymaster's objections (whether to overcharges or undercharges, or calling for vouchers, or further explanation) will be communicated by him, in writing (on Army Form N 1503 when applicable), to Officers Commanding, within a week after the receipt of each Monthly Pay List, and the replies to the objections will be returned without delay, signed by the Officer Commanding. Objections on sub-accounts.

158. Upon receipt of the replies the Paymaster will determine which of the items can be admitted, and will communicate the result in writing to the Officer Commanding.

Wages, or Labour lists.

219. The Paymaster will make the necessary arrangement for the payment of wages of men employed in the various departments. The men at the head-quarters will be paid direct from the office of the Paymaster, upon detailed lists certified to by the heads of their respective departments. The men employed in outlying positions will be paid by the Departmental or other Officer in charge of the men. The money requisite for the purpose will be supplied by the Paymaster, to whom weekly accounts of the expenditure will be furnished by the Officers making such payments. When the wages of labourers are paid, the Officer in charge of the men, or, in the absence of an Officer, the foreman, will invariably attend. The receipt of each individual will be attached to the Pay List unless, on account of the large number of labourers employed, a special exemption to this rule has been sanctioned, the wages being paid on check books.

222. In crediting the sums realised by the sale of unserviceable supplies or stores, no deduction will be made on account of expenses connected with the sale, except the auctioneer's commission.

223. In giving credit in their accounts for drafts upon the Paymaster-General or the Treasury Chest, and in taking credit for repayments, the amount and date of each transaction will be clearly shown, and Paymasters abroad will furnish, as a voucher to their accounts, a memorandum, certified by the Treasury Chest Officer, of the sums drawn from or paid into the Treasury Chest by them during the period of each account. 230. The District Paymaster will report to the War Office any delay on the part of the troops in effecting a settlement, and will state the dates on which the several applications for a settlement have been made.

231. When the sums due on account of stores lost, damaged, or made away with have been credited, the District Paymaster will complete the certificate at the foot of Army Form P 1956, and return one copy to the Commissariat Officer in charge of barracks, retaining the other as a voucher to his account.

SECTION VI.—ABSTRACTS OF EXAMINATION, DECISIONS, AND DISALLOWANCES.

Notification of objections.

236. The correctness of the charges or credits included in all accounts rendered to the War Office will be determined as soon as possible after their receipt by that Department. The objections or disallowances which may arise thereon will be communicated to the Paymaster in the prescribed form. It will be his duty to prepare answers to the abstract of examination of these accounts as soon as he receives the abstract, and if he finds himself unable to forward such answers within 14 days, he will furnish through his Commanding Officer an explanation of the circumstances which occasion the delay.

Replies to objections to be rendered in duplicate. Credit of disallowances at home.

237. The Abstract of Examination, together with the Paymaster's replies, will be returned to the War Office in duplicate.

238. A Paymaster at home will credit in the first Account rendered after the receipt of the War Office "Decisions" upon his "Answers," any disallowances that may be made in such "Decisions."

239. A Paymaster abroad will credit in the first account rendered after the receipt of the Abstract of Examination any disallowances that may be made therein. Any further disallowances that may be made in the War Office "Decisions" upon the answers to the Abstract will, in like manner, be credited in the first account rendered after the receipt of the "Decisions."

Do. 240. The Paymaster will, on the receipt of the Abstract or "Decisions" on his accounts from the War Office, at once recover any sums disallowed which may be due from Officers and others, and, should any difficulty be experienced, he will report the circumstances through his Superior Officer to the Officer Commanding the station or district, so that orders may be given for the immediate payment of the amount claimed (*see also* paragraph 11).

Do. 241. The Paymaster will be personally liable to make good the amount of disallowances arising from errors or over-issues made by him in disregard of regulations or special authority; nor will he be relieved from the necessity of giving credit for such disallowances in the next account rendered by him, on the ground that the recovery referred to in paragraph 240, has not been effected when the account is dispatched to the War Office.

Do. 242. If, after having given credit for disallowances, the Paymaster has any further explanations to submit to the War Office, and such explanations should prove satisfactory, a specific authority will be given to re-charge the sums which may be re-allowed; but the whole amount of all the disallowances will invariably be credited, in the first instance, as directed above.

Do. 243. Similarly, if an Officer, or other person, wishes to appeal against a disallowance recovered from him under paragraph 240, such appeal will be forwarded to the War Office through the General Officer Commanding the District, but the General Officer Commanding will not forward the appeal until he has satisfied himself that the amount of the disallowance has been actually refunded. When, however, the Officer is serving abroad, or is on active service, the General Officer Commanding may, if he considers it is absolutely necessary, allow the repayment to be postponed until the result of the appeal is known, in which case the Paymaster will be relieved from the necessity for crediting the amount, pending a final decision. In the case of Commissariat or Ordnance Store services, the appeal will be forwarded to the General Officer Commanding through the senior Officer of the department, as directed in paragraph 50.

244. In no case will any rate of pay or allowance objected to be issued after the date of the receipt of the Abstract or "Decisions" in which such rate is objected to or disallowed.

245. Upon a change of Paymasters the Paymaster in charge at the time of the receipt of the Abstract or "Decisions," will be held responsible for adjusting the disallowances in conformity with these instructions, and any sums which he is unable to recover locally, for which the outgoing Paymaster will be personally liable,

should be forthwith notified to him with all necessary particulars, with a request for the immediate payment of the amount due.

Claims against
Departmental
Officers.

246. In the cases of claims against Departmental Officers on account of unauthorised issues or loss of stores, credit will likewise be given immediately on the receipt of directions from the War Office.

Disallowances on
Contractor's
claims.

247. When a disallowance has been made on the claim of a Contractor employed under the Royal Engineer Department, after it has been paid by the Paymaster, the over-payment will be recovered in cash, if possible, or if not, will be deducted from the next claim due to the Contractor. In the latter case the amount of the claim will be charged in full against the vote, and credit given for the disallowance.

248. If this course is not practicable the Commanding Royal Engineer will be responsible for the recovery of any disallowances which may be made on charges for Engineer services if arising from errors which might have been detected in his office.

The department
which obtains
the benefit to
bear the expense.

251. When Army Officers or soldiers are employed on naval service, or Naval Officers or men are employed on Army service, the branch which obtains the benefit will bear the expense of any local allowances, or extra or working pay to which the said Officers or men may be entitled by the regulations of their own department.

Mode of
adjustment.

252. All payments which may be due under paragraphs 250 and 251 will be made by the Paymaster or Accountant of the department to which the claimants may belong, and be subsequently adjusted between the War Office and Admiralty, but

the Pay Lists or other vouchers will be certified, in respect of periods and services, by the Officers under whose directions the Officers or men may have been employed.

In-t. 1579.

253. All payments that may be made by Paymasters to Army Officers or men for services performed for the Naval Department will be charged under the head of "Lords of the Admiralty, Repayments," and care will be taken that all pay lists, or other vouchers for such payments, are supported by the certificates required by paragraph 252.

254. Claims preferred by the Paymaster of Royal Marines on account of rations issued and cash advanced to soldiers temporarily attached to that Corps on Court Martial or other duty will be adjusted with as little delay as possible, and the amount remitted, in cash, to such Paymasters. Similarly, claims for rations supplied, or cash advanced, to men of the Royal Marines whilst temporarily attached to Army-Corps, will be addressed directly to the Paymasters of the Divisions or Depôt of the Royal Marines, from whom the amounts shall be recovered.

II. Between Paymasters at Home.

In-t. 1579.

255. At Home stations, advances made by one Paymaster on behalf of another will be adjusted in the following manner, so as to avoid the transmission of bank notes, cheques, or other negotiable documents.

Advance at Home stations

In-t.

256. When a Paymaster has paid a sum on behalf of another Paymaster, he will (except in the case referred to in paragraph 262) notify the amount thereof to the person on whose account the payment has been made, on Army Form O 1682, No. 2.

In-t.

257. On receipt of this Form, the Paymaster for whom the payment has been made will, if satisfied that the amount is correct, at once complete the "Reply" portion of the Form, and return it to the Officer by whom the amount was paid.

Notification of advance.

In-t.

258. The Paymaster for whom the payment has been made will thereupon debit himself with the amount, and on making up his accounts will include it in a Schedule, Army Form O 1686, the total of which he will carry to the last page of the General State (Debit side) of his Accounts, under the head of "Paymasters' Advances."

Reply Form.

In-t.

259. The Paymaster by whom the payment has been made will credit himself with the amount, and on making up his accounts will include it in a Schedule, Army Form O 1685, the items in which will be supported by vouchers on Army Form O 1682, O 1683, or O 1752, hereafter referred to, and the total carried to the last page of the General State (Credit side) of his Accounts, under the head of "Paymasters' Advances."

to the War Office quarterly, although the Advances will only be brought to final account in the Half-yearly Pay Lists.

261. The schedules and vouchers for the first and third quarters of the financial year will accompany the Account Current, and those for the second and fourth quarters will be forwarded with the Half-yearly Pay List.

262. In the case of payments made by a District or Regimental District Paymaster the particulars will be notified on Army Form O 1684, and the reply, instead of being forwarded immediately, as in other cases, will be transmitted, as soon as practicable after the expiration of each month, on Army Form O 1683, and the total amount for the month will be included in the Schedules, Army Forms O 1686 and O 1685.

263. This method of adjustment will also be followed in all cases in which a monthly settlement is usually effected, Army Form O 1682 or O 1683 being used for the purpose.

264. Advances notified on No. 1 Reports, need not be notified on Army Form O 1682, or Army Form O 1684.

265. A similar course to that laid down in paragraphs 256 to 262 will be followed in any case in which a Cash Remittance would otherwise be made from one Paymaster to another, and Army Form O 1682, No. 1, will be used, except in the case of savings bank balances of soldiers discharged at the Royal Victoria Hospital, Netley, as invalids, when Army Form O 1752 will be used. The Paymaster on whose behalf the payment is to be made will debit himself with the amount, and on making up his Accounts will include it in the Schedule, Army Form O 1686, in the manner described in paragraph 258.

266. The Paymaster making the payment will charge the amount in the manner prescribed by paragraph 259, the charge being supported by the Voucher on Army Form O 1682 or O 1752.

Incomplete transactions to be avoided.

267. In order to avoid the introduction into the Accounts of incomplete transactions (*i.e.*, credits to Paymasters' Advances for which no corresponding debits will be found in Accounts for the same period), the Paymaster will be careful not to request on Army Form O 1682, No. 1, that a payment may be made on his behalf, unless satisfied that the Officer to whom the Form is sent can make it. In any case of doubt he will notify by letter his desire that a payment may be made, and will not include the transaction in the Accounts until the actual payment has been reported on Army Form O 1682, No. 2.

Adjustment of Barrack Damages.

268. The adjustment of the sums to be credited to the Public for Barrack damages, &c., will be effected under these Regulations. The Paymaster will be careful to give such information as to Service, Station, and Period, as will at once lead to the identification of the sums to be adjusted.

Fin. Inst. 1878,
and Committee.

269. No amount will be introduced into a Paymaster's accounts as a "Paymaster's Advance," unless both the Officers concerned are agreed as to its correctness. Accountants to be agreed.

No. 270. The governing date inserted in Army Forms O 1682, O 1684, and O 1752 will be that on which the document is actually transmitted; and the charges and corresponding credits for all home transactions will be included in Accounts for the same period. All transactions under this subsection, initiated on or before the 31st of March in each year, will be adjusted in the Accounts to that date. Charges and credits to be within the same period.

No. 271. Fractional parts of a penny will not be inserted in the totals of Army Forms O 1682 and O 1683, or in Army Forms O 1686 and O 1685. Fractional parts of a penny.

iii. Between Paymasters at Home and Abroad.

No. 272. The instructions contained in paragraphs 256 to 271 will, with the following modifications, apply to adjustments between a Paymaster at home and a Paymaster abroad, or between two Paymasters abroad.

No. 273. In such cases Army Forms O 1683 and O 1752 will not be used, but only Army Form O 1682.

No. 274. When Army Form O 1682 No. 1, is used for the purpose of effecting the adjustment, the transmitting Paymaster will send Army Form O 1682, together with any necessary enclosures, to the War Office, by which Department, if the transaction be approved, it will be forwarded, with the necessary authority to make the charge, to the Paymaster to whom it is addressed.

No. 275. When Army Form O 1682 No. 2 is used, the "Reply" will similarly be transmitted to the War Office for the required authority, but it will not be necessary that the Army Form should pass through the War Office until the "Reply" has been duly completed.

No. 276. No charge in respect of such adjustments will be admitted in the accounts under the head of "Paymasters' Advances," without a special War Office authority upon Army Form O 1682. War Office authority required for charges.

No. 277. When one or both of the Paymasters are abroad, the charges and credits under "Paymasters' Advances" will, as far as circumstances permit, be included in the accounts for the corresponding period (see paragraph 270), but when this is impracticable they will be included in the accounts next rendered after the receipt of the necessary documents at the station.

No. 278. Paymasters at foreign stations will not effect adjustments under these regulations with other accountants abroad, unless the delay consequent upon Army Form O 1682 passing through the War Office is immaterial.

IV. Advances to Men relegated to the 1st Class Army Reserve.

279. When a man is relegated to the 1st Class Army Reserve direct from his Corps after improper enlistment, the Paymaster of the Corps in which the man is serving at the time will provide him with railway and passage warrants to the place in the United Kingdom to which he intends to proceed, and issue to him, in cash, such amount as may be necessary for his subsistence on the journey. For coastwise journeys, warrants will be issued for passages without rations.

280. The warrants will be made payable by the Paymaster who issues them.

281. A report will then be made to the Officer paying the Reserve of the District to which the man intends to proceed, giving the following particulars—

- (a.) The Corps in which the man was serving when relegated to the Reserve, and the name under which he was serving.
- (b.) The Corps in which the man served previously to his transfer to the Reserve, and the name under which he served in that Corps.
- (c.) The value of the warrants, and the amount of subsistence money, if any, issued to the man.
- (d.) The District in which the man received his pay at the time he improperly enlisted into the Army.

282. The Officer paying the Reserve will note the value of the warrants, and the amount of subsistence money, if any, and recover the sums due from the man's Reserve Pay. A report that the amount due has been so noted will be made to the Paymaster of the Corps from which the man was relegated to the Reserve.

283. The value of the warrants, and the amount of subsistence money, if any, will be charged by the Paymaster who made the issue, under the head of "Advances to Men relegated to the Army Reserve." The charge will be supported as follows:—

- (a.) By the warrants.
- (b.) By the man's receipt, if any sum has been paid to him for subsistence.
- (c.) By the report referred to in para. 282.

284. If the man does not report himself within six months in the District to which he intended to proceed, a report will be made to the War Office by the Officer who pays the Reserve in such District, giving the particulars specified in paragraph 281.

x. Deferred Pay.

Do. 443. When a soldier is transferred to the Reserve or discharged, the balance of deferred pay due after the settlement of any fines, stoppages, and public or Regimental debts, will be paid or remitted to him under the following regulations, by the Paymaster from whose payment he is transferred to the Army Reserve, or discharged. In the Royal Artillery the issue will be made by the Officer Commanding the Battery.

Do. 444. If a soldier is discharged abroad, or if, when discharged at home, he is about to proceed abroad immediately after discharge, the amount due will be paid to him at the time of discharge, either in cash, or in such other manner as may be convenient. In all other cases a sum of 1*l*. (or the full balance of deferred pay if less than that sum) will be issued to the soldier in cash on discharge or transfer to the Reserve, and the balance will be remitted to him.

1877 A.C. 1880. 445. As a rule, the balance due to a soldier will be paid by Post Office Order. In the event, however, of a soldier electing to be paid by cheque, the cheque will be made payable to order, and will be crossed or not, at the option of the soldier.

Do. 446. Care will be taken to ascertain the soldier's precise address, and if there be no doubt as to his intended place of residence, the Post Office Order, or cheque, will be sent by post to such address. If there be any doubt on the subject, the Post Office Order, or cheque, will be sent to the Post Office nearest to the place at which the soldier intends to reside, addressed:—

The Post Office, _____

To be called for

and he will be directed to call for the order accordingly.

Do. 447. When the deferred pay due to a soldier is remitted to him, under paragraph 445, the Post Office Order, or cheque, will, whenever practicable, be sent on the same day as that on which the man is discharged or transferred to the Reserve.

448. When application is made for Post Office Orders for the payment of deferred pay, a statement will be prepared showing side by side, in parallel columns:

- 1 The amount for which each order is required;
- 2 The Post Office at which it will be made payable;
- 3 The initials and surname of the person to whom it is payable;
- 4 The amount of the fee paid for each order.

This statement will be sent to the Post Office from which the orders are to be obtained, in duplicate, and the Postmaster will be requested to affix to the list returned to the Paymaster his official stamp when the orders have been issued. The Paymaster, on this statement being returned to him, will certify at the foot of it "that the Post Office Orders detailed above have been actually despatched on such or such a date." The statement thus stamped and certified will be forwarded as a voucher to the Pay List in which the deferred pay is charged, and will be accepted as proof of payment.

449. When deferred pay is paid by cheque, the cheque, on return through the Bank, will be forwarded with the Pay List in which the charge for the deferred pay appears, and will be accepted as proof of payment.

ON PROMOTION TO A
COMMISSIONED RANK.

450. The deferred pay to which a non-commissioned officer may be entitled, on his promotion to a Commission or to the rank of Warrant Officer, will be charged in the last account in which his pay as a non-commissioned officer is included. In the event of the appointment as Warrant Officer requiring a period of probation, the deferred pay will not be issued till the appointment is confirmed, but deferred pay will not be issued in respect of such period.

451. The deferred pay to which a non-commissioned officer may be entitled on his completing 21 years' service will be charged in the same account in which his regimental pay is charged at the time. A note of the issue will be made in red ink on the soldiers record of service.

- (2) A detailed computation of the amount on Army Form O 1616.
- (3) A certified statement signed by the soldier showing the amount, if any, deducted from the Deferred Pay in settlement of any fines, stoppages and public or regimental debts, and a reference to the corresponding credit of the public debt, and a receipt for the sum paid in settlement of the regimental debts.

The date to be inserted on the form is that on which the man quits the Head-Quarters of his Regimental or Pension District.

503. The two copies of Army Form D 425 will be collected from each man as he reports himself at the Corps or Depôt to which he is ordered. The Officer Commanding the Corps or Depôt will cause a duplicate of the original to be prepared, in the Orderly Room, on the blank form which the man brings with him. 512. The Paymaster of the Corps or Depôt which the man has joined will then pay him the amount of Reserve Pay and Reserve Deferred Pay to which he is shown, by Army Form O 1728 to be entitled. The man's signature will be obtained, and the Form returned to the Officer paying the Reserve, from whom the amount of Reserve and Reserve Deferred Pay issued will be recovered as an advance. Any allowances to which the man was entitled before leaving the Head-Quarters of his Regimental or Pension District should be issued by the Paymaster of the Corps or Depôt which the man has joined and recovered in similar manner from the Officer paying the Reserve.

513. Separation allowances may either be paid in cash or by Post Office Order under the system established for the payment of pensions, separate Advice Lists being made out for these allowances.

514. When separation allowances are paid in cash, the charge will be supported by the receipt of the person who receives the allowances, and Army Form O 1762 will be used as a voucher for the payment.

1225. If on examination of the arms the Armourer-Serjeant should meet with an arm which he considers unserviceable, or which may require more extensive repairs than he is able to execute on the spot, he should report the circumstance to the Officer Commanding, who will order a Court of Enquiry to assemble, in accordance with paragraph 1159, in order to ascertain if blame is to be attached to any individual, and the arm will be sent to the Royal Small-Arms Repairing Factory at Birmingham, through the Senior Ordnance Store Officer, Tower, as soon after the Annual Examination as possible.

1225(a.) The Armourer-Serjeant will receive such assistance in stripping and re-assembling the arms as may be absolutely necessary. The men so employed will receive working pay at the third rate, under Article 657, Royal Warrant, 11th March 1882 (Army Regulations, Vol. I.)

1225(b.) Arms will be browned in the Regimental District shops once in six years, when the Armourer-Serjeant will receive the assistance provided by Article 730, Royal Warrant, 11th March 1882 (Army Regulations, Vol. I.)

1225(c.) Should it be considered to be for the convenience of the Service not to brown the whole of the arms of a Militia Battalion in one year, arrangements may be made for a portion only to be dealt with. In such cases a careful record will be kept of the numbers of the arms browned, and the date on which this service was performed. This information should be furnished to the Superintendent Royal Small-Arms Factory, in order that he may keep a record of the year in which the arms should be browned.

1225(d.) Should a Militia Battalion be embodied, an Armourer-Serjeant will be attached to it, and the arms will be dealt with in a similar manner to those of the Battalions of Regular Infantry.

1. The Destruction of Heavy Guns when time is immaterial.

-

**1. THE DESTRUCTION OF HEAVY GUNS WHEN TIME IS
IMMATERIAL.**

1. This duty will be performed by the Royal Artillery, the stores marked (a) in the following list being obtained from the Royal Engineers; and the remainder taken from the siege train equipment.

2. The materials required are as follows :—

- (a.) Guncotton (1 lb. slabs), perforated, to receive a dry primer, 2 slabs for each charge, and spare slabs at the rate of 2 spare for every 5 (or less number) of guns to be destroyed.

The slabs are issued wet, and are so kept in store, but it is immaterial whether they are wet or dry when required for use.

- (a.) Guncotton primers, dry, weighing 1 oz., 1½ inches in diameter, coated with tallow; 1 primer for every 2 slabs.

Bags, waterproof, to contain 2 lb. of guncotton, 1 for every 2 slabs carried.

- (a.) Exploder, tension, dynamo-electric.
(a.) Solution, india-rubber, in tin cylinder.
(a.) Twine, stout, 1 lb.

This is sufficient for about 20 charges.

- (a.) Detonators, No. 5, in a cylinder containing 25 detonators, with a rectifier.

Each cylinder will suffice for 20 charges, with 5 spare detonators.

- (a.) Wire, insulated, lengths of 40 yards each.
Five additional yards are required for each charge after the first operation, to replace the wire blown away by a discharge.

Tackle and selvagees, with rollers, skidding, handspikes, &c., for lowering the gun into a pit, or up-ending it under the branch of a tree.

The exact proportion of these cannot be given. It will depend upon the size of the guns to be destroyed, upon local circumstances, &c.

Directions for carrying out the Operations.*

3. Plug up, with a peg of wood, the vent of the gun to be disabled, driven well in so as to make the vent water-tight.

4. Up-end the gun on its breech, either by digging a pit for its reception, or by other convenient means.

5. The officer in charge of the operations must be guided by local circumstances, but the more the gun is raised vertically on its breech the better.

6. Insert the bared terminals of the insulated wires (which must be scraped clean) into the copper eyes of a No. 5 detonator, previously seeing that these eyes are free from paint, &c.

7. Insert the detonator, after securing it to the wires, into a dry primer, first using the rectifier to ensure the hole in the primer being of a proper size to admit the detonator, which should be set home to the head.

8. Care must be taken that the bare ends of the wire do not touch each other when secured to the detonator.

9. *On no account whatever should a detonator be twisted or roughly forced into a primer.*

10. Insert the dry primer, fitted with detonator, into the perforation in one of the 1 lb. slabs, pushing it gently in until the hole in the slab is quite filled by it.

11. Place the slab thus prepared, together with another slab, in a waterproof bag.

12. Choke the neck of the bag with twine closely round the insulated wires; plaster the inner portion of the choke round the wires with the india-rubber solution, and choke again round and above the solution, so as to make the whole as watertight as possible.

13. Attach to the wires a small sinker of any heavy material, so that its weight comes on them above the choke. The sinker should be small in bulk, so as to allow the charge to settle home to the bottom of the bore; and, when hanging freely from its point of support, it should be just below the bottom of the bag.

* See note at end.

14. Attach to the choke a piece of stout twine long enough to reach to the bottom of the bore of the gun, and lower the charge by it carefully to the bottom of the bore, paying out the insulated wires at the same time and taking care that no strain comes on them.

15. Fill up the bore with water; connect the free ends of the insulated wires with the binding screws of the exploder, and, after seeing that all is clear, turn the handle rapidly till detonation occurs.

16. This should be done immediately after lowering the charges into the gun, so as to give the water as little time as possible to effect an entrance into the bag.

17. The operator should be careful to place himself and his party at a safe distance from the gun. A distance of between 30 and 40 yards will probably suffice for this.

18. In the event of a detonator failing, at once disconnect one of the wires from the exploder. The charge must then be taken up and re-made, with a fresh detonator. Great caution must be exercised in slowly extracting the detonator from the primer.

Cautions.

19. Care should be taken to see that the insulation of the wire is perfect, and that the connections are clean and good.

20. If any part of the wire is accidentally denuded of its insulation, prop up the adjacent insulated portion, so that the bared portion will not touch the ground.

21. Detonators by themselves must always be handled with the greatest care and freedom from rough usage, and still more so when they are fitted into guncotton. The latter by itself is harmless.

22. Immediately after an explosion, detach one of the wires at least from the exploder, and do not re-attach it till just before firing the next charge.

2. THE HASTY DISABLEMENT OF SIEGE GUNS AND FIELD GUNS.

23. The hasty disablement of siege guns will be carried out by the Royal Artillery, and of field guns by the Royal Horse Artillery.

Stores required.

24. The necessary supplies of guncotton for the disablement of siege guns will be obtained from the Royal Engineer Siege Park.

25. The following stores will be carried with each unit of the Siege Train:—

Two "wallets, leather," each capable of containing eight 1 lb. slabs of guncotton.

These slabs are issued wet, and are so kept in store; but it is immaterial whether they are wet or dry, when required for use.

One "cylinder, tin, for guncotton primers, 1 oz., 1½-inch dry (to hold 8)."

Two "cases, leather, brown, cylindrical, for detonators," each containing a cylinder, tin, for detonators (No. 8) with 2 feet of safety fuze attached (to hold 8).

One "pouch, leather, brown," with strap, containing box, metal, vesuvian matches, and a twist of twine.

26. The following stores will be carried by each battery of Royal Horse Artillery:—

Six leather cases, each containing a slab of guncotton $6 \times 6\frac{1}{8} \times 1$ ", cut in two pieces.

These slabs are issued wet, and are so kept in store; but it is immaterial whether they are wet or dry when required for use.

Three "cylinders, tin, for detonators (No. 8) with 2 feet of safety fuze attached (to hold 4)."

Three "cases, leather, brown," cylindrical, for cylinder, tin, for detonators and primers.

Three "pouches, leather, brown," with strap, each containing a box, metal, vesuvian matches, and a twist of twine.

Three cylinders, tin, for dry guncotton primers, each to contain

27. These stores will only be issued in time of war. The guncotton and detonators will be carried by the Ammunition Reserve Column till active operations are impending; and, when required in the field, the supply of guncotton (both slabs and primers) will be replenished from the Royal Engineer Field Park.

28. The stores will be carried by horse-holders of Nos. 1, 3, and 5, subdivisions, one set in each subdivision, as follows:—

The cases for guncotton slabs—one on front of each wallet, fastened by a strap going round the wallets, passing through the staple, and then through two loops attached to the ends of the guncotton cases.

(The slabs can be withdrawn without removing the sheep-skin).

The case, leather, containing the detonators and primers—under the picket-peg, in rear of the valise, the top opening on the near side, the sheep-skin covering the whole.

The pouch, leather, for vesuvian matches, and twist of twine—on the waist-belt.

Instructions for carrying out the Operations.*

29. In the case of guns of 64-pr. and larger calibres two slabs must be employed.

30. Insert a detonator into a dry primer.

31. *On no account should a detonator be twisted or roughly forced into a primer.*

32. Insert the dry primer fitted with detonator into the perforation in one of the slabs, pushing it gently in until the hole in the slab is quite filled by it.

33. Tie a piece of twine round the detonator, pass the ends round the slab, and then tie them together; the object being to prevent the primer slipping out of the slab.

34. Place the slabs lengthways on the chase, their long sides touching, about a foot from the muzzle. Tie them on tightly with twine to prevent them slipping from wind or other disturbing cause.

35. The exact position must depend on the form of the gun. The great thing is to have as much of the surface of the cotton in *actual contact* with the gun as possible. Hence the slabs should not ride on an astragal or moulding, but should always be placed on a plain part of the chase.

36. Observe the direction of the wind, and arrange the slab containing the detonator so that the tail of the safety fuze is away from the slab and to leeward of it. This is to lessen the chance of a spark igniting the cotton before the detonator is fired, in which case, in all probability, no effect whatever would be produced on the gun.

37. If projectiles belonging to the gun are available, and time allows, it is advisable to ram one up the bore; so that when the gun is dented by the explosion it may be imprisoned there and prevent the gun from being used even to fire a bag of bullets.

38. Tear or cut the little calico cap off the end of the safety fuze and ignite the fuze by the apparatus provided, or other convenient means. An ordinary flame does not readily ignite it. The fuze ignites most easily when cut obliquely with a sharp knife.

39. Retire to a safe distance (say 50 yards) and await the explosion. The length of safety fuze will burn about 45 seconds.

* See note at end.

40. Should circumstances permit, the effect of the detonation will be increased by placing a filled sand bag or a sod of turf on the guncotton, when lashed in position on the chase. Great care should be taken in this operation not to strike or bend the detonator.

41. It is also advisable, after the explosion, to try if the gun is so dented as to prevent loading. If the dent is not sufficient, the operation should be repeated, putting the fresh slabs in the same place as the first.

Caution.

42. Never roughly bend or kink the safety fuze. If it has apparently gone out without firing the detonator, allow at least half an hour to elapse before meddling with it, if time will admit, but if not, the greatest care must be taken in touching it, to avoid accident by a "hang-fire."

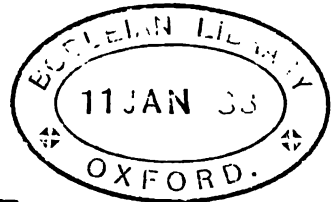

43. The above instructions apply equally to the hasty disablement of field guns, but with them only one slab of guncotton need be used.

NOTE.—The above instructions have been prepared with special reference to the disablement or destruction of muzzle-loading guns. Breech-loading guns can generally be temporarily disabled by the removal or destruction of portions of the breech apparatus. In destroying such guns, or rendering them permanently disabled, Officers will, while being guided generally by these instructions, use their discretion as to the application of the charges in such positions as may appear most suitable, according to the particular construction of the gun to be operated upon.

II.—AUXILIARY FORCES.**YEOMANRY CAVALRY.****Allowances of Adjutants.**

Clause 234 The following will be substituted for paragraph 2, Clause 53, Auxiliary and Reserve Forces Circulars, 1876:—

3. An Adjutant of Yeomanry Cavalry will further be entitled to the money allowances at the Army rates in lieu of forage and of stabling for one horse if actually kept, and the regulated allowance in aid of providing a servant, together with the lodging allowance, and fuel and light allowance, at the rates prescribed for his regimental rank in the Regular Forces. During permanent duty, forage and stabling allowances, at Army rates, may be drawn for two extra horses if actually used, though not necessarily the Officer's own property.

VOLUNTEERS.**Instructors—Transfers from the Army—Allowances.**

Clause 235 In pursuance of the alterations made by Clauses 164 and 173, Army Circulars, 1882, in regard to the pay of non-commissioned officers of the Permanent Staff of the Volunteer Force serving on their Army engagements, the following will be substituted for subsections (e) and (f), paragraph 268, of the Regulations for the Volunteer Force, 1881 (Army Regulations, Vol. IX.), and will have effect from the 1st August 1882:—

- (e.) To Lodging Allowance, when not provided with public quarters, at Army rates, according to Army rank after transfer, and subject to Army Regulations.

Regulations for the Commissariat and Transport Staff.

**REGULATIONS FOR THE COMMISSARIAT AND
TRANSPORT STAFF.**

Exemption from Custom Duties.

The following will be substituted for paragraphs 178 to 182 of **Clause 236** the Regulations for the Commissariat and Transport Staff, 1881, (Army Regulations, Vol. IV., Part I.) :—

178. In Foreign Possessions of the Crown, the Senior Commissariat Officer will apply to the Colonial Government for the remission or rebate of duties on supplies of every description, imported or supplied by sea or inland carriage or navigation, for the public use of Her Majesty's Forces, whether the duties are imposed by Acts of the Imperial Parliament, or of the Colonial Legislatures.

179. He will also apply for a rebate of duty on supplies sold for the public use of the troops, though not directly imported for that purpose.

180. When articles ordinarily liable to duty are supplied under contract for the use of the troops, the following course will be pursued, except in those Colonies where the steps indicated in paragraphs 182*a* and 182*b* are taken :—

- (*a*.) The Senior Commissariat Officer will cause a statement to be prepared detailing the articles to be imported, and specifying the vessel in which they have arrived or will arrive.
- (*b*.) He will forward this statement to the proper Custom House Officer, and obtain authority thereon for the admission of the supplies free of duty.
- (*c*.) He will then hand over the statement to the Commissariat Officer who is to receive the supplies, in order that he may deliver the same to the Collector of Customs at the port where the goods are to be landed. The Commissariat Officer will give a receipt in duplicate for the articles delivered to him under the superintendence of the Officers of Customs.

181. These regulations are not intended to sanction the importation of any goods from places or in vessels not authorised by law. No greater quantity of goods than shall be mentioned in the statement laid before the Senior Commissariat Officer will be landed without his previous sanction; and all articles imported for the purpose of being supplied under contract for the use of the troops will be liable to the same examination and form of entry as goods imported in due

course of trade, and will be landed only in the usual hours of business, and in the presence of an Officer of the Customs, except in cases of emergency, and by special order of the Governor, which will be obtained by the Senior Commissariat Officer, as directed in paragraph 178.

182. With the view of preventing articles which have been imported duty free, for the use of Her Majesty's troops, from being brought into general consumption without the payment of duty, the following course will be pursued:— Heads of Departments will furnish the Senior Commissariat Officer with quarterly certificates of the articles and quantities imported duty free, which have been actually used or retained for Army service; and the Senior Commissariat Officer will forthwith apprise the Officers of the Customs of the particular quantities, and the description of the articles, returned to contractors, or sold, or otherwise not used or retained for Army service, in order that they may be enabled to levy and claim the duty thereon.

182a. In Colonies where, instead of allowing the free importation of articles for the use of the troops, a rebate of duty is granted, Heads of Departments will furnish to the Senior Commissariat Officer, quarterly certificates of the articles and quantities actually used for Army service on which duty is to be repaid, in order that he may take the necessary steps for obtaining rebate. In the case of articles provided under contract, these certificates will be given to the contractors to enable them to claim the rebate direct.

182b. This course will also be followed with regard to the rebate to be given for supplies not imported directly for the troops, though afterwards purchased for the public use.

On orders being given for the re-transfer to the Army Reserve Clause 239 of the soldiers who were called out on permanent service, by Her Majesty's proclamation of the 25th July 1882, the following instructions will be observed:—

1. The re-transfer of the men to the Army Reserve will be carried out in accordance with the instructions contained in Section XIX. of the Queen's Regulations and Orders for the Army governing the ordinary transfer of soldiers to the Reserve on the expiration of their term of service with the Colours, subject to the following modifications.

General Regulations (Reserve Forces)—continued.

Clause 239
continued.

2. On receipt by the Corps of the order for de-mobilization, a furlough of 42 days will be granted to each soldier re-transferred to the Army Reserve, and the date of the expiration of such furlough will be considered for all purposes as the date of the expiration of Army service with the Colours.

3. Men in hospital will be dealt with as prescribed in para. 97*a*, Section XIX., of the Queen's Regulations and Orders for the Army, and will not be re-transferred to the Army Reserve until fit to travel. Men in prison will not be re-transferred until the expiration of their imprisonment. Both men in hospital and men in prison will be granted furlough on re-transfer to the Army Reserve, in accordance with para. 2.

4. Each man, before proceeding on furlough, will be furnished with the documents specified in para. 96, Section XIX., Queen's Regulations and Orders for the Army, and will be instructed to report himself before the expiration of his furlough, either personally or by letter, to the Officer paying the Army Reserve of the District in which he intends to reside.

5. The man, if he reports himself by letter, will be instructed to forward with his letter his protecting certificate. New parchment Descriptive Returns (Army Form D 426) will be issued to the men in exchange for their protecting certificates.

6. In preparing the documents for transmission to the Officers charged with the payment of the Army Reserve, each man's service will be completed up to and including the date on which his 42 days' furlough will expire; a fresh "Proceedings on discharge" (Army Form B 268) and "Parchment Discharge Certificate" (Army Form B 128) being prepared in each case.

7. The men will in all cases be marched to the railway station or steamer under proper charge. General Officers or other Officers Commanding Districts or Stations will make the necessary arrangements to ensure regularity, punctuality, and order. Officers Commanding will give timely notice to the railway authorities in the case of large numbers requiring conveyance on the same day.

8. The men will, from the date of re-transfer to the Reserve, be shown in all returns as re-transferred from the Corps with which they were serving at the time of de-mobilization.

9. Separation allowance will not in any case be issued beyond the end of the month in which the men are sent to their homes.

General Regulations (Reserve Forces)—*continued.*

10. A list of the men of each regiment or Corps to be re-transferred will at once be forwarded to the Officer Commanding the Depôt, in order that no further advance of separation allowance may be made to the wives and families of the married men. Clause 239
continued.

*11. Separation allowance will be issued to the wives and families of men who may remain in hospital or in prison under para. 8.

12. Although the men will proceed on furlough on de-mobilization, they will be entitled to travelling expenses and the same allowances as if sent to their homes under the ordinary conditions of transfer to the Reserve, except that they will be allowed to go to their intended places of residence within the United Kingdom, even if involving greater cost than a journey to the place of their attestation.

13. The accounts of the men will be completed up to the date of the expiration of the 42 days' furlough. The men will receive, on quitting their Corps, the balance of pay and allowances due to them up to that date, excluding the advance for the period of furlough, and an advance of 10s. out of the pay due to them for the period of furlough.

14. The balance of pay and allowance in lieu of rations for the period of furlough, together with the Army Deferred Pay for the period of mobilization, will be remitted to each man at his intended place of residence in the manner prescribed for the payment of deferred pay (paras. 445 to 449 of the Financial Instructions).

15. The men will receive Army Deferred Pay under the usual conditions for the period they received Army Pay, and will not, at the end of the financial year or on discharge, if discharged before the end of the financial year, receive Army Reserve Deferred Pay for such period. Cl. 204, A.G.,

The following will be added to the Financial Instructions, 1882, after paragraph 454:— **Clause 245**

In the latter case, he will sign the declaration on the form specifying the rate at which he wishes the allotment to be paid. Such rate will not, however, exceed three-fourths of his daily pay.

454d. The Paymaster or other Officer specified in paragraph 454b will, as soon as he receives the statement on Army Form O 1796, proceed to issue the amount of the allotment from the date of embarkation to the end of the month in which the statement is received, and will continue to make the payment monthly in advance.

454e. If the money cannot be paid to the wife in person, it will be remitted by means of an ordinary Post Office Order.

454f. The Paymaster will furnish to the War Office monthly a statement in duplicate showing the rank and name of the soldiers to whose families allotments have been paid, the periods of payment, and the amounts paid. This statement will be supported by proof of payment, and the first issue will also be supported by the statement on Army Form O 1796, showing the amount payable. The recovery of the amounts issued will be effected by the War Office through the Paymaster of the Corps on active service.

454g. Should any casualty occur among the men to whose families an allotment is being paid, or any circumstance arise materially affecting the allotment, it will be the duty of the Paymaster of the Corps on active service to send an immediate notification of such casualty or circumstance to the War Office, stating to what date the allotment has been recovered.

454h. The regulations contained in paragraphs 454a to 454g, apply to soldiers on the Married Establishment, but soldiers not on the Married Establishment will, with their own consent, be allowed to allot a portion of their pay for the benefit of their families on the same conditions. EQUIPMENT REGULATIONS.

I.—REGULAR FORCES.

Ammunition.

The following will be substituted for Sub-Section III., **Clause 255** Section VII., Part I., of the Equipment Regulations, 1881 (Army Regulations, Vol. III.), as amended by Clauses 193 and 282, Army Circulars, 1881:—

III. GUN AMMUNITION AND ROCKETS FOR PRACTICE AND EXERCISE.

Horse and Field Artillery.

245. The proportions of gun ammunition and rockets for practice and exercise for each battery of Horse and Field Artillery are as follows:—

Equipment Regulations (Regular Forces)—*continued.*

246. Thirty common shells, out of the number allotted to batteries in Ireland, will be fired with time fuzes bored to burst within the limits prescribed for Shrapnel.

Clause 255

continued.

Common shells to be fired as Shrapnel.

Prize competition.

247. The proportions for practice include 60 common shells for prize competition, 30 being fired plugged.

248. Cartridges will be supplied filled.

Cartridges.

249. Shells supplied to replace those used for the annual practice will, except at certain stations where it may be convenient to issue filled shells, be issued empty, with plugs and gas-checks, and will be filled by the batteries. In such cases the following stores will be issued at the stations where the batteries are quartered, and will be returned into store when the operation of filling the shells is completed:—

Shells to be issued empty.

250. Whenever shell-filling rooms or laboratories exist at a station, the operation of filling shells will be performed therein; at other stations the Officer Commanding the Battery will be held responsible that proper arrangements are made to ensure safety, and that the precautions laid down in Appendix VII. are as far as possible observed.

Precautions to be observed.

251. Gun ammunition will be demanded on Army Regulations. Form G 806, and will be dealt with in the manner laid down for small-arm ammunition.

Equipment Regulations (Regular Forces)—continued.

Clause 255

continued.
Dismissal of
Recruits.

252. Three rounds of common shells (plugged), and three of blank ammunition, are allowed for the dismissal of each Recruit, and such ammunition will be applied for as may from time to time be required on Army Form G 808.

Oldest ammuni-
tion to be used
first.

253. Ammunition of the oldest manufacture will always be first expended, and will be replaced by the next supply from store. A proportion of any new pattern of ammunition will be issued to each battery carrying on triennial practice.

Plugged shells.

254. Shells required to be fired plugged will be taken from the empty shells supplied to replace those used at practice, and filled as directed in paragraph 277. In the exceptional cases mentioned in paragraph 249, the filled shells will, when the practice is carried on over land ranges, be emptied of powder and refilled as laid down in paragraph 277; when the practice is carried on over the sea, and there is no danger of their being recovered, shells may be fired filled with powder and plugged.

Fuzes for boring.

255. For instructional purposes, unserviceable M.L. time fuzes are allowed annually, as under—

Garrison Artillery.

Garrison
Artillery.

256. The allowance of ammunition for the annual practice of Garrison Artillery is comprised under two heads—viz., Battery Practice and Station Practice.

Battery practice.

257. Battery practice includes the allowance both for instructional and competitive firing.

Armament guns
to be used for
Battery practice.

258. With the object of familiarising the Officers and men with the particular equipment they have in charge, care will be taken that the Instructional Battery Practice shall be carried out, whenever practicable, from the guns forming a part of the armament of the district in which the battery is stationed, the guns being served from their proper magazines, &c. A statement showing the number of rounds fired from each 7-in. R.M.L. gun, and upwards, will accompany the Station Practice Report (paragraph 282*h*).

Guns for com-
petitive practice.

259. Competitive practice, being solely for the purpose of testing the skill in laying, of individual non-commissioned officers and gunners, may be carried on from such guns as are, in the opinion of the Officer Commanding, most suitable for the purpose.

Station practice.

260. At station practice all heavy guns, 7-in. R.M.L. and upwards, exclusive of those from which battery practice

Equipment Regulations (Regular Forces)—continued.

is carried on, and which are so mounted as to be capable of being fired with projectiles with safety, will be fired three times, consecutively, every second year,* and from all other heavy guns, 7-in. R.M.L. and upwards, from which practice with projectiles cannot be carried on, three rounds of blank ammunition will be so fired. The above rounds will invariably be fired from the whole of the guns in each separate work on the same day. **Clause 255**
continued.

261. As a rule, station practice will be carried on annually from half the guns in a district, the whole of the guns in each of the works chosen for this practice, being manned simultaneously, and all arrangements made which would be necessary in action; the object being both for instruction and for testing thoroughly the working condition of the carriages and gear, and of all the fitments of the forts and batteries, for supply of ammunition, and for fighting the guns generally. Arrangements
for station
practice.

262. Particular attention should be paid to the arrangements necessary in each fort or battery for its proper subdivision into groups of guns, with a view to its efficient control and command in action, and to the proper directing of its fire under all circumstances; and, in order to ensure that the experience gained in such station practice is not lost, a special report of it will be included in the Station Practice Report, *vide* paragraph 282*h*, describing in detail the mode adopted, with any remarks and recommendations that may suggest themselves for guidance in future practice. Special report of
arrangements
made.

263. Targets will be laid out for shotted practice if practicable, and in certain districts it may be found advantageous to lay down a "special idea" for each occasion of the station practice from particular forts. In such cases targets will be placed in the positions hostile ships attacking the fort might be expected to take up, and the fire of the work directed upon them. A copy of the "special idea" will accompany the Station Practice Report. Targets for
shotted practice.

264. When it is necessary for the purpose of practice or exercise, to remove the bulkheads separating the emplacements of the heavy R.M.L. guns, the service will be carried out by the Royal Artillery, the Royal Engineer Department furnishing such explanation as may be requisite to expedite the removal. The bulkheads will also be replaced by the Royal Artillery. Removing bulk-
heads.

265. The responsibility for any damage done during the removal or replacing of the bulkheads, due to want of care, will fall on the Royal Artillery. Responsibility
for damage.

* Every year at Gibraltar and Malta.

Equipment Regulations (Regular Forces)—*continued.*

Clause 255*continued.*Allowance for
station practice.

266. For station practice, the biennial allowance of ammunition for each gun capable of being fired with projectiles with safety will be—

Nature of Projectile.	12·5-in.	12-in.	11-in. or 12-in. 25-ton.	10-in.	9-in.	7-in.
Shells, empty, Palliser ..	3	3	3
Shot, Palliser	3	3	3

Shrapnel shells.

267. In those works where Shrapnel shells are allowed as part of the equipment, these projectiles may be substituted for Palliser projectiles to the extent of one third the total number of rounds allowed.

Blank ammunition.

268. For blank ammunition, battering charges will be used for 12·5-in. guns, and full service charges for all other guns for which no blank charge may have been prescribed.

Allowance for
battery practice.

269. For battery practice, the normal allowance of ammunition will be annually—

Nature of Projectile.			7-in. R.M.L.	80 or 64-pr. R.M.L.	7-in. R.B.L.	40-pr. R.B.L.	Mortars.	Total.

9-in. guns may
be used in lieu
of 7-in.Normal allow-
ance may be
commuted for
lighter natures.

270. If 7-in. R.M.L. guns are not available, 10 rounds may be fired from 9-in. guns.

271. In order to facilitate instruction in the use of the various natures of ordnance which may be available for practice in districts, especially where the instruction in heavy gun firing conveyed through "Station Practice" alone, is ample for all purposes, and more practice with medium guns or lighter natures is desirable, Commanding Officers may commute the normal allowance for its equivalent value in other descriptions of ammunition, on the condition that more than the normal number of rounds are not fired from R.M.L. guns of 7 in. or over, and that the maximum number of rounds fired does not exceed 150.

Equipment Regulations (Regular Forces)—*continued.*

272. When such commutations are desirable or necessary, **Clause 255** the following scale of alternative numbers of rounds will be *continued.* adhered to :—

2 rounds	9-in. R.M.L. are equal to—
3 "	7 " "
or 5 "	7 " R.B.L.
" 5 "	80 or 64-pr. R.M.L.
" 8 "	40-pr. R.B.L.
" 14 "	20 " "
" 10 "	10-inch mortars.
" 20 "	8 " "

Scale of commutation.

273. When any commutation is intended, the Officer Commanding Royal Artillery will, after conference with the Senior Ordnance Store Officer, submit to the General Officer Commanding what it is proposed to be, in time to obtain his sanction thereto prior to the preparation of the annual estimates, which, when passed, will govern the natures of ammunition to be used for practice during the ensuing season.

O.C.R.A. to confer with S.O.S.O. when commutation is intended.

274. In the event of rifled guns of position forming a portion of the armament of the garrison or fortress, the Officer Commanding Royal Artillery may use his own discretion in carrying on practice from such guns; the number of rounds expended will form part of the total allowance for each battery of Garrison Artillery.

Guns of position.

275. At stations where 7-in. or 40-pr. R.B.L. guns are alone available for practice besides S.B. ordnance, the following proportions of ammunition will be allowed annually :—

Proportions where 7-in. or 40-pr. R.B.L. and S.B. are alone available.

Nature of Ordnance.	Shell.		Total.
	Common.	Segment.	
7-in. R.B.L.	25	25	50
S.B.	100
40-pr. R.B.L.	40	35	75
S.B.	75
			150

276. All Palliser projectiles, and all descriptions of 12·5-in. projectiles, will be fired with battering charges, and all other projectiles will be fired with full or service charges.

Charges to be used.

277. All common shells, except the 7-in. R.B.L., 80-pr., and all lighter natures, will be fired without fuzes, or bursting charges, but they will be filled with a mixture of two parts (by measurement) of sand to one of sawdust (this mixture being of about the same specific gravity as gunpowder,

Filled shells.

the shell when filled with it may be regarded as being of the same weight as if it contained a bursting charge). The shells will be plugged with the wood plugs representing time fuzes, the metal plugs being returned to store. In places where firing live shells is permitted, all Shrapnel and segment shells, and all shells for 7-in. R.B.L., 80-pr., and all lighter natures, will be filled and fired as for service. In places where no live shell can be used, common shell will be fired in place of shrapnel or segment, and, in the case of 7-in. R.B.L., 80-pr., and all lighter natures, will be loaded with blowing charges, for which calico bags will be supplied, and properly fuze.

Palliser shells to be filled.

278. All Palliser shells will be brought up to their "filled" weight in the same manner as common shells.

Shells firing blowing charges to be filled.

279. All shells fired with blowing charges will be filled with dry coal dust, space only being left for the insertion of the fuze and of the bag containing the blowing charge.

Mortar shells.

280. Fuzes, with blowing charges only, will be supplied for mortar shells.

Coast Brigade.

281. Divisions of the Coast Brigade will have the same proportions as Garrison Batteries, the different detachments participating, as far as possible, in the practice.

Rockets.

282. At home, 20 Hale's rockets will be supplied yearly by the Commandant to each battery which carries out its annual practice at the School of Gunnery, Shoeburyness.

Requisitions for gun ammunition.

282a. Demands for ammunition will be made on Army Form G 805, and will be dealt with in the manner laid down for small-arm ammunition. Projectiles condemned *for practice only* being demanded, if there are none on charge.

Dismissal of Recruits.

282b. Two rounds with shot or shell, and three of blank ammunition, are allowed for the dismissal of each Recruit, and such ammunition will be applied for, as may from time to time be required, on Army Form G 808.

Gas-checks to be used.

282c. Projectiles for which gas-checks have been approved, will invariably be used at station or battery practice with gas-checks, except in the case of guns ordered, on account of scoring, to be used without gas-checks.

Ammunition longest in charge to be first used.

282d. The ammunition of oldest manufacture will always be first expended, and will be replaced by the next supply from store. Shells required to be fired plugged, should be taken from the empty shells on charge.

Equipment Regulations (Regular Forces)—*continued.*

Clause 255
continued.

255e. No spare fuzes will be authorized for practice, but spare friction tubes will be allowed in the proportion of 10 per cent.

Spare fuzes and tubes.

255f. Calico and paper bags for bursters of shells need not be returned to store at the conclusion of gun practice, but should be shown as expended.

Calico and paper bags.

255g. Care will be taken that the annual and biennial lacquering of bores, prescribed in Appendix V., paragraph 13, is carried out immediately after the conclusion of the annual and biennial practice.

Lacquering bores.

255h. Reports on the result of station practice will be rendered, annually, in duplicate, by the Officer Commanding Royal Artillery, through the General Officer Commanding, to the Deputy Adjutant-General, Royal Artillery, Horse Guards, directly after the conclusion of the practice.

Clause 257 1. Instructions—

(d.) For the preparation of Shells and Fuzes for B.L. guns on the "Interrupted Screw" system,

have been approved, and will be issued to Officers and others concerned.

2. Copies of these Instructions, printed on Army Form G 928, will be posted in Laboratories, and any other buildings in which the operations to which they relate are carried on. Officers Commanding Royal Artillery, and Senior Ordnance Store Officers, will put forward demands for such numbers of copies of this Form as will meet the requirements of their respective stations.
